

STARLINK

Dedicated Service
Guaranteed Speeds – 99.9% SLA

Starlink Dedicated Service delivers guaranteed throughput over LEO constellation purpose-built for mission-critical operations that demand predictable, high-bandwidth connectivity in locations where traditional infrastructure falls short.

Major Benefits

Guaranteed Throughput	Dedicated bandwidth with sustained speeds up to 2400/600 Mbps (Bonded Kits) or 20/20 Gbps (Bonded Gateways).
99.9% Availability SLA	Enterprise-grade uptime commitment backed by a formal Service Level Agreement for Bonded Starlink Kit configurations.
Massive User Capacity	Support 1,000+ concurrent users with Bonded Kits or 10,000+ users with Bonded Gateways with the third-party routing hardware.
Linear Scalability	Throughput scales approximately linearly as terminals are added, allowing capacity to grow with operational demand.
Flexible Payment Options	Monthly payments, upfront prepayments and hardware payment plans available to suit capital and operational budgets.

Service Tiers

Bonded Starlink Kits	Sustained Speeds	Hardware
Dedicated Tier 1	720 / 180 Mbps	6x Performance Kits
Dedicated Tier 2	1440 / 360 Mbps	12x Performance Kits
Dedicated Tier 3	2400 / 600 Mbps	20x Performance Kits

Bonded Gateways	Sustained Speeds	Hardware
Dedicated 0.5 Gbps	0.5 / 0.5 Gbps	4x Gateways
Dedicated 2 Gbps	2 / 2 Gbps	4x Gateways
Dedicated 5 Gbps	5 / 5 Gbps	4x Gateways
Dedicated 10 Gbps	10 / 10 Gbps	4x Gateways
Dedicated 20 Gbps	20 / 20 Gbps	6x Gateways

Pricing available upon request. All plans require URSYS engineering and design.

How to Get Started

Engage URSYS	As a Starlink Authorised Reseller, URSYS manages the full qualification and procurement process.
Site Qualification	Provide your use case, bandwidth requirements and site coordinates. URSYS engineering evaluates each opportunity individually.
